Healthier Communities

Investment: \$2 million
Time period: 2 years
Expected outcome: Reduce in obesity rate
Current index: 46% obesity rate
Expected index: 10% obesity rate

Progress indicators after : 300 crimes

i About the project

The concept of our project is to build a whole-of-government ERP framework with a strong emphasis on an analytics and simulation engine. Every Federal govt. faces strategic challenges, such as Gender Inequality, Health, Agriculture, Crime Reform, Education Drop Outs, Infrastructure and Unemployment. These govt. challenges are cascaded to a state and local council level.
